WORK EXPERIENCE

Fujitsu – Application Systems Engineer/Consultant
August 2022 – Present
- Developed and enhanced systems across multiple projects using various technologies, including Java, C#, PostgreSQL, and many others.
- Created test evidence and authored documentation for a new technology that is introduced to the team.
- Utilized project management tools like ServiceNow, Azure, and MS Teams.
- Worked closely with Japanese project managers, often using interpreters to facilitate communication, to develop and enhance systems.

Eastwest Bank – Programmer Analyst
February 2020 – July 2022
- Developed and maintained console applications and websites using C# and ASP.Net
- Created programs and modules for the bank's core banking system (T24)
- Created and maintained GoAnywhere MFT workflows for secure file transfers
- Created test evidence for the developed and modified systems
- Created documentation for deploying systems to UAT and Production, and oversaw the deployment process
- Supported QA testers in SIT and users in UAT
- Support and troubleshoot production issues with the production support team
- Coordinate with T24 technical support to resolve issues that cannot be handled internally.

City Mayor's Office (Lucena City) - Programmer/Graphic Artist/Resident IT/Admin Staff
June 2018 – February 2020
- Developed, maintained, and troubleshoot desktop applications for various offices
- Designed layouts for tarpaulins, brochures, flyers, certificates, polo shirts, etc.
- Maintained and troubleshoot computers and printers for various offices within the Government Complex
- Managed requests and distribution of trophies, medals, and tarpaulins

City Mayor's Office (Lucena City) - OJT Staff
January 2018 – May 2018
- Developed software applications
- Troubleshot computer issues
- Provided technical support
